Functions

ML20100 Mortise Locks

Series/Function	Type	Function Description
ML20133 No Key Override No Deadbolt	Entry	<ul style="list-style-type: none"> • Deadlocking latch • Latch retracted by inside lever at all times • Outside lever rigid except when in "passage" mode or valid user code entered
ML20134 With Key Override No Deadbolt	Entry	<ul style="list-style-type: none"> • Deadlocking latch • Latch retracted by inside lever at all times • Outside lever rigid except when in "passage" mode or valid user code entered • Key outside retracts latch • No deadbolt function
ML20135 No Key Override With Deadbolt	Entry	<ul style="list-style-type: none"> • Deadlocking latch • Latch and deadbolt retracted by inside lever at all times • Outside lever rigid except when in "passage" mode or valid user code entered
ML20136 With Key Override With Deadbolt	Entry	<ul style="list-style-type: none"> • Deadlocking latch • Latch and deadbolt retracted by inside lever and deadbolt at all times • Outside lever rigid except when in "passage" mode or valid user code entered • Key outside projects or retracts deadbolt and retracts latch

ML20200 Mortise Locks

Series/Function	Type	Function Description
ML20233 No Key Override No Deadbolt	Entry	<ul style="list-style-type: none"> • Deadlocking latch • Latch retracted by inside lever at all times • Outside lever rigid except when in "passage" mode or valid user code entered
ML20234 With Key Override No Deadbolt	Entry	<ul style="list-style-type: none"> • Deadlocking latch • Latch retracted by inside lever at all times • Outside lever rigid except when in "passage" mode or valid user code entered • Key outside retracts latch • No deadbolt function
ML20235 No Key Override With Deadbolt ¹	Entry	<ul style="list-style-type: none"> • Deadlocking latch • Latch and deadbolt retracted by inside lever at all times • Outside lever rigid except when in "passage" mode or valid user code entered
ML20236 With Key Override With Deadbolt ¹	Entry	<ul style="list-style-type: none"> • Deadlocking latch • Latch and deadbolt retracted by inside lever and deadbolt at all times • Outside lever rigid except when in "passage" mode or valid user code entered • Key outside projects or retracts deadbolt and retracts latch

¹ Deadbolt required for escape return functionality (a residential requirement in Canada)

CL33100 Cylindrical Locks

Series/Function	Type	Function Description
CL33134 With Key Override	Entry	<ul style="list-style-type: none"> • Latch retracted by inside lever at all times. • Key outside retracts latch. • Outside lever locked (freewheeling) except when in "passage" mode or valid user code entered.
